

OUTPUT-VACCINATION DETAILS

VS Code Output

The screenshot shows the VS Code interface with a terminal window open. The terminal displays the output of a Python script named 'Vaccination.py'. The script prompts the user to enter details for a vaccination record, including name, age, gender, phone number, email, Aadhar number, city, vaccination dose, and doctor name. The output shows the details of 11 individuals, including their names, ages, genders, phone numbers, email addresses, Aadhar numbers, cities, vaccination doses, and doctor names. The terminal also shows the user's input for each prompt and the script's response.

```

Email Output

The image is a screenshot of a Microsoft Outlook application window. The title bar at the top reads "Inbox - Gmail 2". The interface is divided into several sections. On the left is a blue sidebar with navigation icons for Mail, Calendar, People, and Tasks. The main area is split into two panes. The left pane shows the "Inbox" list with a search bar at the top. It contains several email entries from "jenishasundari@gmail.com". The second entry, dated "11:36" with the subject "(no subject)", is selected and highlighted in blue. The right pane shows the details of the selected email, including the sender's name and email address, the time "11:36", and the body text "Hi..Jeni Your details succesfully added to vaccination portal". Above the email body in the right pane are action buttons: "Reply", "Reply all", "Forward", "Archive", "Delete", "Set flag", and a toggle switch for "Try the new Outlook". At the bottom of the screen is the Windows taskbar, which displays the system clock as "12:27" on "12-09-2023", along with various application icons and a search bar.
